Executive Summary

Aspect Consulting, LLC (Aspect) has prepared this Phase I Environmental Site Assessment (ESA) report on behalf of the Olympic Property Group for the proposed Suzuki residential development project (Project) located on Kitsap County Parcel No. 222502-4-006-2005, located at the southeast corner of the intersection of NE New Brooklyn Road and Sportsman Club Road NE in Bainbridge Island, Washington, referred to herein as the Subject Property. We also performed a geotechnical investigation in support of the proposed Project. The details and geotechnical analyses are presented in a separate report.

The Subject Property is currently an undeveloped, forested 13.8-acre parcel. The Subject Property is shown relative to surrounding physical features on Figures 1 and 2, Vicinity Map and Site Plan, respectively.

As early as the 1940s, adjacent and nearby properties were generally undeveloped or developed with residential and agricultural uses. The pond on the southern portion of the Subject Property appears in the 1968 aerial photograph. Between 1981 and 1990 there was construction of the existing Bainbridge Island High School bus maintenance garage on the east-adjacent property. Between 1990 and 1994, the existing Woodward Middle School buildings were constructed on the northwest-adjacent property across the intersection of NE New Brooklyn Road and Sportsman Club Road NE. Construction began in 1994 of the single-family residential development to the south and southeast of the Subject Property. Residential development continued gradually in the vicinity of the Subject Property through the 2000s.

This assessment revealed no evidence of recognized environmental conditions (RECs) in connection with the Subject Property, with the following exception:

1. Several areas of household debris were observed on the ground surface during our reconnaissance of the Subject Property. During our subsurface geotechnical investigation, one of the test pits (TP-03 shown on Figure 2) encountered about 0.5 feet of human-placed fill material that contained trash consisting of cans, bottles, and metal car parts. The dumping of materials on the Subject Property represents a REC.

We recommended that the areas of debris and the area of buried fill materials be removed, and characterization of the soil below be completed. Aspect can provide a scope of work and cost estimate for these services upon request.

This executive summary should be used only in the context of the full report.

1 Introduction

Aspect Consulting, LLC (Aspect) has prepared this Phase I Environmental Site Assessment (ESA) report on behalf of the Olympic Property Group for the proposed Suzuki residential development (Project) located on an undeveloped, forested 13.8-acre parcel (Kitsap County Parcel Number 222502-4-006-2005) in Bainbridge Island, Washington, referred to herein as the Subject Property. We also performed a geotechnical investigation in support of the proposed Project. The details and geotechnical analyses are presented in a separate report. The Subject Property is shown relative to surrounding physical features on Figures 1 and 2, Vicinity Map and Site Plan, respectively.

The purpose of the Phase I ESA is to identify, to the extent practicable using standard methods, the presence or likely presence of Recognized Environmental Conditions (RECs) associated with the Subject Property. As defined by Section 1.1.1 of ASTM International (ASTM) E1527-13, RECs are: hazardous substances or petroleum products under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the properties or into the ground, groundwater, or surface water of the properties. RECs can be further evaluated as:

- Controlled RECs (CRECs), defined as "a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls..."
 - CRECs are considered a REC; however, the risk to the property can be low if the engineering controls and subsurface conditions remain unchanged.
- Historical RECs (HRECs), defined as "a past release of any hazardous substances
 or petroleum products that has occurred in connection with the property and has
 been addressed to the satisfaction of the applicable regulatory authority or meeting
 unrestricted use criteria established by a regulatory authority, without subjecting
 the property to any required controls."
 - HRECs are not considered RECs because the represented conditions have been previously addressed to the satisfaction of the applicable regulatory authority with no use restrictions, and do not pose a threat of environmental impact to the property.

A summary of the RECs, CRECs, and HRECs to the Subject Property, if identified, is presented in Section 7 of this report. The Phase I ESA was performed in general accordance with the ASTM E1527-13 guidelines and the U.S. Environmental Protection Agency's (EPA) Title 40 Code of Federal Regulation (40 CFR) Part 312 *Standards and Practices for All Appropriate Inquiries (AAI)*. Deviations from these guidelines are described in Section 1.3 of this report.

1.1 Scope of Work

The scope of services for this ESA consisted of the following tasks:

Site Reconnaissance

1. Conduct a visual inspection of the Subject Property and surrounding properties to identify potential sources of contamination and to document the status of the Subject Property at the time of this assessment. Photographs obtained during the site reconnaissance are included in Appendix A.

Interviews

- 2. Interview the ESA User for property information and the purpose of the ESA. The User Questionnaire and property information provided by the User are included in Appendix B.
- 3. Interview a "key site manager" with knowledge of the current and historical uses of the Subject Property as identified by the User or Subject Property owner, and request that the "key site manager" interview be conducted during the site reconnaissance, or by telephone if they are unavailable at the time of the reconnaissance. The "key site manager" is defined in ASTM E1527-13 as "the person identified by the owner or operator of a property as having good knowledge of the uses and physical characteristics of the property."
- 4. Attempt to interview current occupants whose operations are the most likely to use, store, treat, handle, or dispose of hazardous substances now or in the past, or who are most likely to have information regarding other potential RECs. And, attempt interviews with past occupants to fill historical use data gaps, except where duplicative of information obtained from other sources. For abandoned properties, attempt to interview one or more owners or occupants of neighboring or nearby properties.
- **5.** Interview a representative of the State and/or local agencies, such as the local fire department, health department, and/or State environmental or human health regulatory agencies as necessary to gather information or fill data gaps regarding the history of the Subject Property and surrounding properties that may pose a potential REC.

Records Acquisition and Review

- **6.** Review property information to identify ownership, confirm the legal description/location, and identify property use restrictions, where present. This information is included in Appendix B.
- 7. Request and review all previous environmental reports for the Subject Property, including reports regarding hazardous building materials (HBM), summarize pertinent information in the reports, and evaluate the environmental risk associated with report findings and data gaps, if warranted.

- **8.** Review historical records to identify past land use activities at the Subject Property (to the first developed use, or 1940, whichever is earlier) and surrounding properties, and evaluate the environmental risk associated with the identified activities. Historical records obtained are included in Appendix C.
- **9.** Review physical setting information to identify the topographic, hydrologic, geologic, and hydrogeologic conditions in the area of the Subject Property, including the current 7.5-minute topographic map (provided by the U.S. Geological Survey [USGS] or equivalent). Sources reviewed are listed in Section 5 and/or are included in Appendix C.
- 10. Contact potential sources of environmental records, including Federal and State regulatory databases, and review records provided to identify facilities with past or current regulatory enforcement activities of environmental concern. The search includes facilities on, or formerly on, the Subject Property, and at distances designated in ASTM E1527-13. The regulatory database search report is included in Appendix D.

Evaluation and Report

11. Preparation of this Phase I ESA report to document the findings, significant data gaps, and conclusions of the assessment, and to present recommendations for further investigation, if needed. Declaration of the environmental professional who completed this assessment is included in Section 9.

1.2 Significant Assumptions

The conclusions of this Phase I ESA are based on research of readily available and reasonably ascertainable² current and historical information sources, interviews, and a site reconnaissance visit as described in Section 1.1. When possible, Aspect researched multiple sources to corroborate information. Aspect has assumed that the information sources reviewed are correct unless another source indicated otherwise.

The scope of services did not include an environmental compliance audit or a hazardous building material (HBM; e.g., asbestos, lead-based paint, radon, lead in drinking water, toxic mold, urea-formaldehyde insulation and, other materials) survey of on-site structures or debris as part of this Phase I ESA. If existing HBM reports were provided for Aspect review, they are summarized in Section 3.4.

The scope of services did not include soil, groundwater, soil gas, indoor or outdoor air, or surface water sampling. If existing environmental reports describing sampling activities were provided for Aspect review, they are summarized in Section 3.5.

¹ The term "developed use" is defined in ASTM E1527-13 as "agricultural uses and placement of fill dirt."

² The term "reasonably ascertainable" is defined in ASTM E1527-13 as "information that is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.

ASPECT CONSULTING

The scope of services did not include wetland assessment or delineation. If existing assessment reports were provided for Aspect review, they are summarized in Section 3.4.

1.3 Deviations to Scope of Work

The Subject Property was heavily vegetated and difficult to traverse. Aspect traversed a large portion of the Subject Property during our reconnaissance, as indicated on Figure 2. However, the entire Subject Property was not observed. Because the areas are unlikely to contain more than *de minimis* quantities of hazardous materials, this deviation is unlikely to alter the findings of this study and is not considered a significant data gap.

2 Subject Property Description

This section presents a description of the Subject Property and adjoining properties and a summary of the physical setting. Characteristics of the Subject Property and adjoining properties are shown on the Site Plan, Figure 2.

2.1 Current Use and Development

At the time of this study, the Subject Property is undeveloped, forested land. The property is currently vacant (see Section 4.1). The Subject Property vicinity is moderately developed with roadways, school maintenance buildings, residential developments, and limited commercial areas (see Section 4.2).

2.2 Physical Setting

According to the geologic map, the Subject Property and vicinity are underlain mainly by Vashon till (Qvt) (Haugerud and Troost, 2011). Vashon till is described as a matrix-supported, dense, sandy diamict composed of a mixture of silt, sand, and gravel. Vashon till was material deposited at the base of the Cordilleran Glacier and was overridden and compacted by glacial ice, creating a dense/hard configuration.

Based on our 12 geotechnical test pits and 1 hand exploration that were advanced across the site, the Subject Property is underlain by a 0.5- to 1-foot layer of topsoil underlain by 6 to 13 feet of Vashon till, in agreement with the geologic map. One test pit encountered 0.5 feet of fill material at the ground surface, including trash consisting of cans, bottles, and metal car parts (TP-03, shown on Figure 2).

The Subject Property is relatively level with gentle undulations on the eastern area with average Elevation 215 feet (North American Vertical Datum 88, [NAVD88]). The western portion of the Subject Property slopes moderately down from about Elevation 215 down to about Elevation 175 feet. The lowest area of the Subject Property is at the southwest corner at Elevation 145 feet. The highest area of the Subject Property is at the southeast corner at Elevation 240 feet (AGO, 2018).

No historical Sanborn maps were available for the Subject Property and vicinity.

A small pond was observed along the southern boundary of the Subject Property, as shown on Figure 2. During our site visits in August, we did not observe any other areas of standing water or surface water flow. It is our understanding that seasonal water flow is observed on the western portion, as shown on Figure 2. However, we did not observe flow or evidence of flowing water, due to the vegetation growth.

Groundwater was not encountered in our geotechnical test pits. According to the Environmental Data Resources, Inc. (EDR) report, there are several resource protection or public drinking water wells within a 0.5-mile radius of the Subject Property. And groundwater ranges from an approximate depth of 18 feet below ground surface (bgs) to 60 feet bgs. The eight domestic and one industrial water well records, within a 0.5-mile radius of the Subject Property, reviewed indicated static groundwater 18, 21, 31, 38, 45, 45, 60, and 116 feet bgs (Ecology, 2018).

3 User-Provided Information and Interviews

This section presents a summary of the information provided to Aspect by the User, the Subject Property representative identified as the "key site manager" for this study, previous environmental reports for the Subject Property, and information available in Aspect's files for the neighborhood.

3.1 User Questionnaire and Interview

Douglas Schulze of the City of Bainbridge Island, Subject Property owner representative, completed the User Questionnaire on September 19, 2018, a copy of which is included in Appendix B. Mr. Schulze indicated that he was unaware of any environmental cleanup liens or any activity and land use limitations against the Subject Property. Mr. Schulze indicated that the Subject Property has been used for strawberry crops in the past. Mr. Schulze indicated that Christine Brown at the City of Bainbridge Island was a key individual with knowledge of the Subject Property. Mr. Schulze did not provide copies of any additional information (e.g., title records, environmental liens, etc.) that may identify conditions that pose a possible environmental concern or REC to the Subject Property.

Christine Brown was interviewed on September 24, 2018. The City of Bainbridge Island purchased the Subject Property in 2000 for the purpose of developing the property for a police and court facility. The direction of the development changed in 2008. Garbage was removed after dumping occurred in 2008. The Subject Property is currently undeveloped and unused. A summary appraisal was completed on May 8, 2007 and the parcel was valued at \$3,520,000. A summary appraisal of the parcel was completed on March 1, 2008 and market value of the fee simple interest was determined to be \$5,400,000. The current assessed land value of the parcel is \$723,450.

The Client provided the Title Report effective September 12, 2018, prepared by Pacific Northwest Title, a copy of which is included in Appendix B. The title report included information regarding an easement granted along the Subject Property boundaries. The title report does not identify any potential environmental concern and is not considered a REC.

3.2 Property Representative Interviews

Alison Dennison of Aspect interviewed three property representatives with varying knowledge of the Subject Property's historical and current conditions. Details from our interview with a representative of the property broker are as follows:

Olympic Property Group

Property manager representative for the Project with 3 years of knowledge of the Subject Property

Ms. Stephanie Foster was interviewed during the project kick-off meeting on July 27, 2018. Ms. Foster indicated that she did not know of any existing environmental concerns, but that historically, homeless or transient people had been observed camping on the property. During our time on the Subject Property, we did not observe any people or evidence of people currently on the property.

BGE Environmental, LLC

Wetlands consultant for the Project with 3 years of knowledge of the Subject Property Ms. Robbyn Myers, PWS, was interviewed during the project kick-off meeting on July 27, 2018. Ms. Myers indicated that she observed a seasonal creek located on the western portion of the Subject Property, on the west-facing, moderate slope during the wet, winter months (about February of 2018).

High Meadows Excavating, LLC

Excavation contractor for the Project and a resident in Bainbridge Island for over 50 years with knowledge of the Subject Property

Mr. David Monsaas indicated that the northern portion of the Subject Property was used by young adults for racing cars in the late 1970s.

3.3 Information Regarding Environmental Liens

Information regarding environmental liens or other use limitations (AULs) was not provided by the User or property representative. Aspect reviewed the results of an environmental lien search completed by EDR (Appendix D). The results of the search did not reveal any evidence of environmental liens or other AULs associated with the Subject Property.

3.4 Information Regarding Hazardous Building Materials

The Subject Property is not currently developed with a structure. Therefore, no hazardous building materials are present on the Subject Property.

4 Subject Property Reconnaissance

4.1 Subject Property Observations

On August 14 and 17, 2018, Alison Dennison of Aspect conducted a site reconnaissance to document the current status of the Subject Property. On August 20 and 21, 2018, Na Hyung Choi of Aspect traversed the northern portion of the Subject Property to excavate the 12 geotechnical test pits. On September 20, 2018, Bill Grimm of Aspect traversed the northwest corner of the Subject Property to advance one geotechnical, hand exploration. The site reconnaissance focused on open areas, easily traversed areas, and existing foot or animal trails to observe areas with potential environmental implications (if present), including potential chemical storage, chemical usage, and waste disposal practices, and signs of activities other than those documented in the historical records.

At the time of our site reconnaissance, the Subject Property was undeveloped and forested. The Subject Property was most easily accessed by a foot trail at the northwest corner of the Subject Property that crossed to the east and exited near the southeast corner of the Subject Property. During the reconnaissance, Aspect walked the boundary of the Subject Property to observe alternative access points.

The Subject Property was heavily vegetated and difficult to traverse (Photographs 3 and 4). Aspect traversed a large portion of the Subject Property during our reconnaissance, as indicated on Figure 2. However, the entire Subject Property was not observed. Because the areas are unlikely to contain more than *de minimis* quantities of hazardous materials, this deviation is unlikely to alter the findings of this study and is not considered a significant data gap.

A summary of our observations from the site visit is provided in Table 1, below. Approximate locations of the features described below are shown on Figure 2, Site Plan. Photographs of the Subject Property are provided in Appendix A.

SUMMARY—Evidence of the following RECs were identified during the site reconnaissance:

 Several areas of household debris were observed on the ground surface during our reconnaissance of the Subject Property. During our subsurface geotechnical investigation, one of the test pits (TP-03, shown on Figure 2) encountered about 0.5 feet of human-placed fill material that contained trash consisting of cans, bottles, and metal car parts. The dumping of materials on the Subject Property represents a REC. **Table 1. Subject Property Observations**

	Ohaa		e 1. Subject Property Observations
_	Obse		_
Feature	Yes	No	Comments
Evidence of underground storage tanks (USTs)		Χ	Not observed.
Aboveground storage tanks (ASTs)		Х	Not observed.
Chemical, hazardous substances, and petroleum products use or storage		Х	Not observed.
Hydraulic hoists		Х	Not observed.
Drums or other containers	Х		1 5-gallon hydraulic-oil container was observed to be empty near the eastern property boundary (OB-06 on Figure 2, Photograph 7).
Evidence of leaks and spills of hazardous materials or corrosion		Х	Not observed.
Evidence of past uses of the Subject Property		Х	Not observed.
Hazardous waste		Х	Not observed.
Solid waste		Х	Not observed.
Universal Waste		Х	Not observed.
Unmanaged waste or debris piles	х		Four debris piles of household waste were observed on the northern portion of the Subject Property. One pile contained a truck canopy (OB-01 on Figure 2, Photograph 8). One pile contained a stripped car (OB-02 on Figure 2, Photograph 8). One pile contained blankets, tarps, metal debris, and household containers (OB-03 on Figure 2, Photograph 10). One pile contained a tarp (OB-04 on Figure 2, Photograph 11). One pile contained plastic lawn chairs, bottles, and cans (OB-05 on Figure 2, Photograph 12). The debris piles represent a REC.
Potable water supply		х	A public drinking water storage tank is located south of the southeast corner of the Subject Property. Several water lines are located in the access road that runs along the east side of the Subject Property. No service lines are connected to the Subject Property.
Sewage disposal system (including septic systems and drainfields)		Х	Not observed.
Heating/Cooling System		Х	Not observed.
Electrical transformers or other PCB containing equipment		Х	Not observed.
Interior floor drains, sumps, or drywells		Х	Not observed.
Stormwater drainage		Х	Not observed.
Oil/water separators		Х	Not observed.
Standing water or pools of liquid (e.g., pits, ponds, lagoons, etc.)	Х		A small pond with a foot path around it was observed along the southern boundary of the Subject Property, (Photographs 5 and 6, shown on Figure 2).

ASPECT CONSULTING

	Observed?		
Feature	Yes	No	Comments
Wells (including dry wells, irrigation wells, injection wells, abandoned wells, water supply, monitoring wells, or other wells)		X	Not observed.
Discolored or stressed vegetation		Х	Not observed.
Discolored or stained pavement		Х	Not observed.
Unusual odors		Х	Not observed.
Other Environmental Condition(s) of Concern		Х	Not observed.

4.2 Adjoining Property Use Observations

Adjoining properties were observed from adjacent rights-of-way on August 14 and 17, 2018. Adjoining properties or buildings were not entered, only public rights-of-way around the Subject Property were traversed by foot and vehicle. The Subject Property is situated in an area that is generally developed with single-family residences and the local high school and school maintenance facility. A description of the conditions observed on the adjoining properties during the site reconnaissance visit is presented below.

North – The property to the north across NE New Brooklyn Road is occupied by a single-family residential development, Northtown Woods. The development is well kept and is not considered a REC.

East – The property to the east across the paved and gravel roadway is used by the Bainbridge Island High School maintenance facility.

South – The property to the south is developed with single-family residences. The development is well kept and is not considered a REC.

West – The property to the west across Sportsman Club Road NE is undeveloped, forested land and single-family residential properties. The development is well kept and is not considered a REC.

Adjoining property uses do not represent RECs to the Subject Property.

FINAL

5 Historical Use Information

The history of the Subject Property and adjoining properties was compiled through review of historical sources and reasonably ascertainable information pertaining to the Subject Property. Historical sources reviewed by Aspect included:

- Aerial photographs obtained from EDR dated 1944, 1951, 1968, 1971, 1977, 1981, 1990, 1994, 2006, 2009, 2013, and 2017
- No Sanborn® Fire Insurance maps were available from EDR
- Topographic maps obtained from EDR for the years 1937, 1949, 1968, 1981, 1997, and 2014
- Excerpts from historical city directories obtained from EDR for approximate 5year intervals from 1982 through 2014
- Current and historical tax assessor documents provided by Kitsap County and Puget Sound Archives
- Pertinent information provided during interviews with the User, key site manager for the Subject Property, and others, as appropriate (see Section 3)

The historical resources acquired during this study is in general accordance with the requirements of ASTM 1527-13 Section 8.3; when reviewed collectively, no historical record acquisition "data failures" were identified. Copies of the historical records obtained from the sources above are provided in Appendix C. The following subsections provide a synopsis of the findings of the historical review.

5.1 Subject Property

The earliest record of the Subject Property is a 1944 aerial photograph that shows a vacant forested lot, surrounded by forested areas, and agricultural fields with single-family residences. From a 1951 aerial photograph, part of the Subject Property was cleared, and a driveway was created off of NE New Brooklyn Road. Between 1951 and 1968, a small pond was constructed along the southern Subject Property line and NE New Brooklyn Road was extended along the northern property boundary toward the east. The parcel appears in aerial photographs to be actively maintained with a driveway from at least 1951 through 1981. After 1981, the Subject Property appears densely forested, and the driveway is no longer visible.

No structures were visible in aerial photographs and were not documented in any current or historical assessor records.

SUMMARY – The Subject Property has been vacant and forested since at least 1944; therefore, no RECs have been identified on the Subject Property.

_

³ Data failure is defined in ASTM as a failure to achieve the historical research objectives, even after reviewing the standard historical sources that are reasonable ascertainable and likely to be useful.

5.2 Adjoining and Surrounding Properties

As early as the 1940s, adjacent and nearby properties were generally undeveloped or developed with residential and agricultural uses. Subsequent aerial photographs depict the expansion of the school-district buildings to the southeast of the Subject Property. Mostly residential development continued gradually in the vicinity of the Subject Property through the 2000s, when the areas were fully developed with commercial and residential uses, as described below.

North and Northeast – In 1944, the area to the north across NE New Brooklyn Road was undeveloped and forested, and the area to the northeast was cleared agricultural land with associated structures. Between 1994 and 2006, the existing residential development was constructed across NE New Brooklyn Road. Between 2013 and 2017, the agricultural land to the northeast was transformed into the existing business park and Christmas tree farm.

Northwest – From 1944 through at least 1990, the area to the northwest across the intersection of Sportsman Club Road NE and NE New Brooklyn Road was undeveloped and forested. Between 1990 and 1994, the existing Woodward Middle School buildings were constructed.

West – From 1944 through 1960, the area west across Sportsman Club Road NE was mostly forested with one area cleared for residential use. Between 1981 and 1990 the residential area was further cleared, and residences were constructed as they appear today.

Southwest – From 1944 to 2017, the vicinity to the southwest of the Subject Property across Sportsman Club Road NE was undeveloped and forested. In 2017, an existing single-family residence was constructed.

South – From 1944 through 1971, the area south and west of the Subject Property appears to be used for agriculture. The pond appears in 1968. The first known residential development to the south and southeast of the Subject Property was a series of single-family homes along Commodore Lane NW starting in 1994.

Southeast – The property directly to the southeast has always been forested and undeveloped.

East – The east-adjacent property appears undeveloped and forested until construction of the existing Bainbridge Island High School bus maintenance garage that was constructed between 1981 and 1990. The EDR and Washington State Department of Ecology (Ecology, 2004) records identify that the bus maintenance garage has an existing and operating underground storage tank (UST) on the property, installed in 1989. According to EDR, the UST is between 5,000 to 9,999 gallons, made of single-walled steel, and was operational as of 1996. No spills or leaks have been reported for the UST located at the maintenance garage.

SUMMARY – The Subject Property vicinity has been historically forested, and occupied by single-family residences and the school district from at least 1944 to present.

Based on the information provided by EDR and gathered from Ecology, and based on the relative distance of at least 200 feet west and downgradient of the Subject Property, the UST located on the east-adjoining property is not considered a REC.

6 Regulatory Environmental Records Review

Aspect requested and reviewed records and database listings pertaining to the Subject Property obtained from regulatory and government agencies to identify conditions that may pose a REC to the Subject Property.

A summary of the requested records is presented in Section 6.1, and findings of the records review are presented in Section 6.2.

6.1 Requested Records

Regulatory Environmental Database Search – Aspect contracted EDR to conduct a regulatory agency databases search for listings pertaining to the Subject Property and surrounding properties within the standard ASTM-prescribed search radii. The database search was completed on August 14, 2018. Aspect reviewed <u>all</u> database listings for the Subject Property and adjoining properties. For the remaining database search results, Aspect used the following screening criteria to focus the review based on the high density of listed sites in the area and our understanding of the hydrogeologic conditions in the vicinity:

- Sites listed only on databases that are not indicative of a past release were considered low risk and were not reviewed. For this study, these databases include: RCRA, AST, UST, FINDS, ALLSITES, and NPDES.
- Any nonadjacent sites in the EDR report that were located greater than 0.5 miles in any direction from the Subject Property were eliminated as low risk for contaminant migration to the Subject Property.
- Sites located downgradient and greater than 0.25 miles from the Subject Property were eliminated as low risk for contaminant migration to the Subject Property.

Aspect also reviewed a list of "orphan" sites, or sites identified in the databases with incomplete address information. Aspect's review found that the orphan site listings are either not located within a 1-mile radius of the Subject Property, and/or do not include listings that indicate a possible risk of past or future contaminant release; therefore, the orphan site listings were excluded from further evaluation. The results of the database search by EDR are included in Appendix D.

Washington State Department of Ecology – Aspect requested a file review to Ecology for the Subject Property and adjoining properties on September 11 and October 3, 2018.

The Subject Property was not identified in any of the regulatory databases reviewed by Ecology on October 3, 2018. Based on the historical and existing use as undeveloped forested land, the Subject Property is not considered a REC.

Aspect requested a file review to Ecology for the eastern-adjacent property on September 11, 2018. The eastern-adjacent property is the Bainbridge Island School District 303 at 9451 NE New Brooklyn Road. Ecology provided all documents for the property on September 19, 2018. Aspect reviewed the information provided that documented that there has been no documented leakage of the UST. Ecology has compliance records since

the installation of the tank since the installation in 1989. Based on this review, the UST on the east-adjoining property does not represent a REC to the Subject Property.

Kitsap County Public Records Program – Aspect submitted a public records request to Kitsap County on August 15, 2018, for any Subject Property records maintained by the county health and environmental departments. Aspect has received a response to our request on August 22, 2018, that Kitsap County does not possess any records for the Subject Property.

Washington State Archives – Aspect submitted a public records request to the Puget Sound Regional Branch of the Washington State Archives on August 15, 2018, for any Subject Property records maintained for the Subject Property. Aspect reviewed a parcel card dated April 17, 1973, that indicated that the Subject Property was undeveloped.

Bainbridge Island Fire Department – Aspect contacted the Bainbridge Island Fire Department on August 7, 2018, to request any records pertaining to hazardous materials storage or incidents at the Subject Property. The Bainbridge Island Fire Department responded on September 18, 2018, that they do not have any records for the Subject Property.

City of Bainbridge Island – Aspect contacted the City of Bainbridge Island's public records department on August 7, 2018, to request any records pertaining to any information regarding USTs or hazardous materials on the Subject Property. The City of Bainbridge Island responded on August 14, 2018 that they have been unable to locate any information regarding UST "decommissioning or hazardous material permits, incidents or violations" for the Subject Property.

6.2 Records Review Findings

6.2.1 Subject Property

The Subject Property was not identified in any regulatory databases by EDR. Based on the historical and existing use as undeveloped forested land, the Subject Property is not considered a REC.

6.2.2 Adjoining and Surrounding Properties

The following adjacent and surrounding properties were identified (Figure 2):

1. Bainbridge Island School District 303 – 9451 NE New Brooklyn Road Existing UST, 200 feet east, downgradient

The Bainbridge Island School District 303 site was identified by EDR on the following regulatory databases of environmental concern: UST, RCRA NonGen/NLR, and ALLSITES. According to the database listings and Ecology's website, the site currently has an operational UST between 5,000 and 9,999 gallons. No known spills or leaks were identified during the review of online Ecology files and EDR database records.

Based on the aerial photographs the UST is likely located slightly greater than 200 feet from the Subject Property (the exact location is unknown and not shown on Figure 2), but is located downgradient, and no evidence of spills or leaks has been

observed or documented. Based on the downgradient location and the relavitve distance of 200 feet from the UST to the Subject Property, and no evidence indicating past releases to the surrounding vicinty, the presence of the UST on the east-adjoining property does not represent a REC to the Subject Property.

2. Bainbridge Fire Station 21 – 8895 Madison Avenue

Former leaking UST site, 1,300 feet northeast, downgradient

The Bainbridge Fire Station 21 was identified by EDR on the following regulatory databases of environmental concern: UST, CSCSL NFA, ALLSITES, and NPDES. According to the database listings and Ecology's website, petroleum-contamianted soil was discovered at the site in 1999, and groundwater was reportedly not affected by petroleum contamination. Ecology granted a No Further Action (NFA) determination for the UST release cleanup on May 21, 2012. Ecology's website does not provide information regarding the remedial efforts made to mitigate the petroleum-impacted soil. It is reported on Ecology's website that the petroleum contaminated soil was remediated below Washington State Model Toxics Control Act (MTCA) Method A cleanup levels.

During construction of the new Fire Station 21 in 2017, Aspect provided geotechnical and environmental consulting services. In May 2017, the fill soils were removed in area of the USTs removed in 1999. Soil samples collected in the area of the storage tanks were below MTCA Method A cleanup levels in soil for gasoline- and dieselrange petroleum hydrocarbons, and benzene, toluene, ethybenzene, and xylens (BTEX) compounds. It appears previous cleanup efforts substantially met the cleanup requirements under MTCA.

Due to the initial cleanup and our involvement of the removal of the fill material in the area of the USTs and the distance being greater than 200 feet from the Subject Proeprty in the downgradient direction, the Bainbridge Fire Station 21 does not represent a REC to the Subject Property.

3. Bainbridge Island Sportsmens Club – 8203 Sportsman Club Road NE *Metals-impacted site*, 1,400 feet southwest, downgradient

The Bainbridge Island Sportsmens Club was identified by EDR on the following regulatory databases: CSCSL and ALLSITES. According to the database listings and Ecology's website, concentrations of MTCA metals were identified on the property, and north-adjoining properties have been remediated to below cleanup levels in soil and groundwater at the site. Ecology granted a NFA determination for the cleanup on March 26, 1994. No additional details regarding the cleanup are provided on Ecology's website.

Because the release area is located greater than 200 feet from, and downgradient relative to, the Subject Property, this site <u>does not</u> represent a REC to the Subject Property.

6.2.3 Area-Wide Contamination

Aspect also conducted a search of state and federal websites for readily available information that may concern areawide soil and groundwater contamination in the Subject Property vicinity.

6.2.3.1 Asarco Smelter Plume

According to Ecology's website, wide-spread lead and arsenic contamination in near-surface soil has been identified throughout a large zone in the south Puget Sound region, that originated from an Asarco copper smelter that historically operated in Tacoma, Washington, for over 100 years. The Subject Property is located inside the zone, in the area of least impact with typical range of arsenic detections between non-detect and 20 parts per million (ppm) (the MTCA cleanup level for arsenic). Based on our experience in the neighborhood, there is low likelihood of significant impact to the Subject Property from the Asarco smelter, and it is not considered a REC.

6.2.3.2 Radon Zones

According to EPA's Map of Radon Zones, the Subject Property vicinity and Kitsap County are mapped within Radon Zone 3, defined as areas with low potential for radon gas and a predicted average indoor screening levels of less than 2.0 picoCuries per liter (pCi/L; EPA, 2017). This is well below the EPA-recommended Action Level for radon of 4.0 pCi/L; therefore, radon is not considered a REC.

7 Evaluation

7.1 Significant Data Gaps

No significant data gaps were encountered during the research conducted for this Phase I ESA report.

7.2 Findings and Conclusions

Aspect has performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527-13 for the Suzuki residential development Project located on an undeveloped, forested 13.8-acre parcel (Kitsap County Parcel Number 222502-4-006-2005) in Bainbridge Island, Washington. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report. This assessment revealed no evidence of RECs in connection with the Subject Property, with the following exception:

Several areas of household debris were observed on the ground surface during our reconnaissance of the Subject Property. During our subsurface geotechnical investigation, one of the test pits (TP-03 shown on Figure 2) encountered about 0.5 feet of human-placed fill material that contained trash consisting of cans, bottles, and metal car parts. The dumping of materials on the Subject Property represents a REC.

This assessment did not reveal any CRECs, HRECs, or *de minimis* conditions in connection with the Subject Property.

7.3 Recommended Further Action

The results of this study indicate a potential for petroleum, solvents, and metals contamination to soil at the Subject Property, and, potential sources of volatile contamination were identified at, and within 200 feet of the Subject Property.

We recommended that the areas of debris and the area of buried fill materials be removed, and characterization of the soil below be completed.

9 Declaration of Environmental Professional

"I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Sec. 312.10 of 40 CFR Part 312.

"I have the specific qualifications based on education, training, and experience to assess a property to the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

Alison J. Dennison, LEG

Project Engineering Geologist

Doug L. Hillman, LHGPrincipal Hydrogeologist

9.1 Qualifications of Environmental Professional

Alison J. Dennison is a registered licensed engineering geologist (LEG) in Washington State (#2716) with at least 16 years of part-time experience completing Phase I ESAs. **Doug Hillman** is a registered licensed hydrogeologist geologist (LHG) in Washington State (#385) and meets the definition of an Environmental Professional per 40 CFR Part 312.

⁴ A person who does not qualify as an Environmental Professional may assist in the conduct of all appropriate inquiries in accordance with ASTM E 1527-13, if such a person is under the supervision or responsible charge of a person meeting the definition of an environmental professional when conducting such activities.

10 Limitations and Exceptions

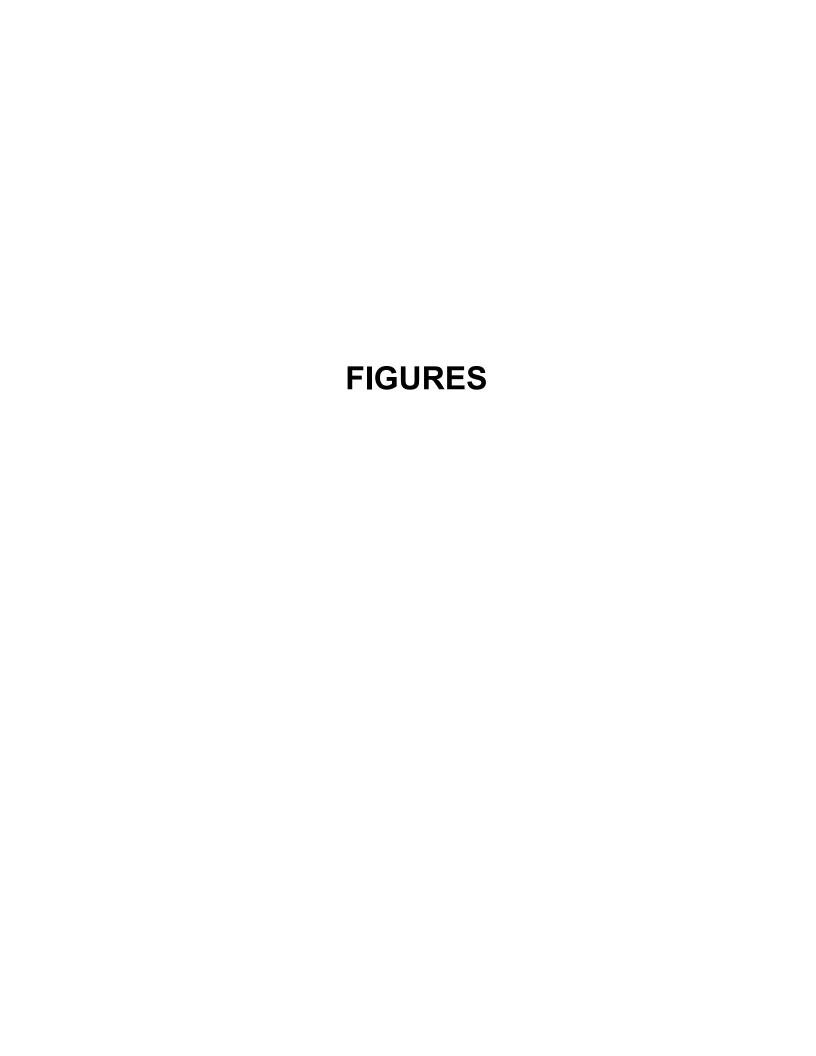

This Phase I Environmental Site Assessment was prepared for use by the Olympic Property Group (Client) and may not be relied upon by any other person or entity without the express written consent of Aspect Consulting, LLC (Aspect). The Phase I Environmental Site Assessment was prepared in accordance with the agreement between Aspect and Client, dated April 19, 2018, and fully executed on August 6, 2018 (Agreement), as well as ASTM E1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," and 40 CFR Part 312, U.S. Environmental Protection Agency's (EPA) "Innocent Landowners, Standards for Conducting all Appropriate Inquiries."

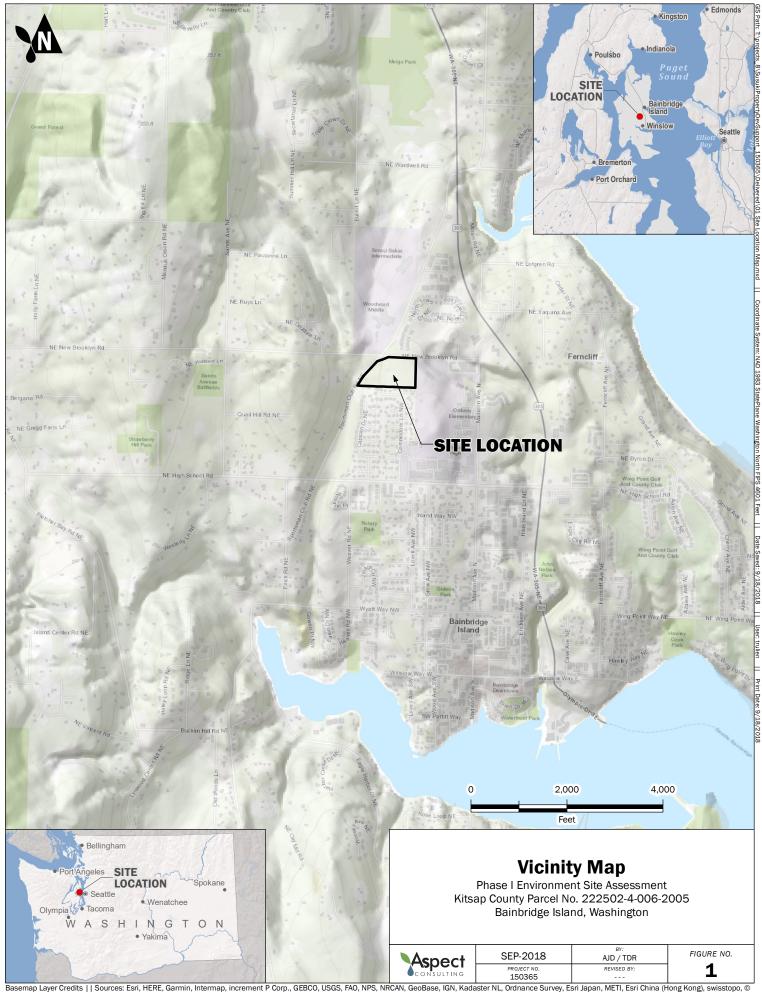

This report was prepared in accordance with recognized standards of professionals in the same locality and involving similar conditions. No other warranty, express or implied, is made by Aspect.

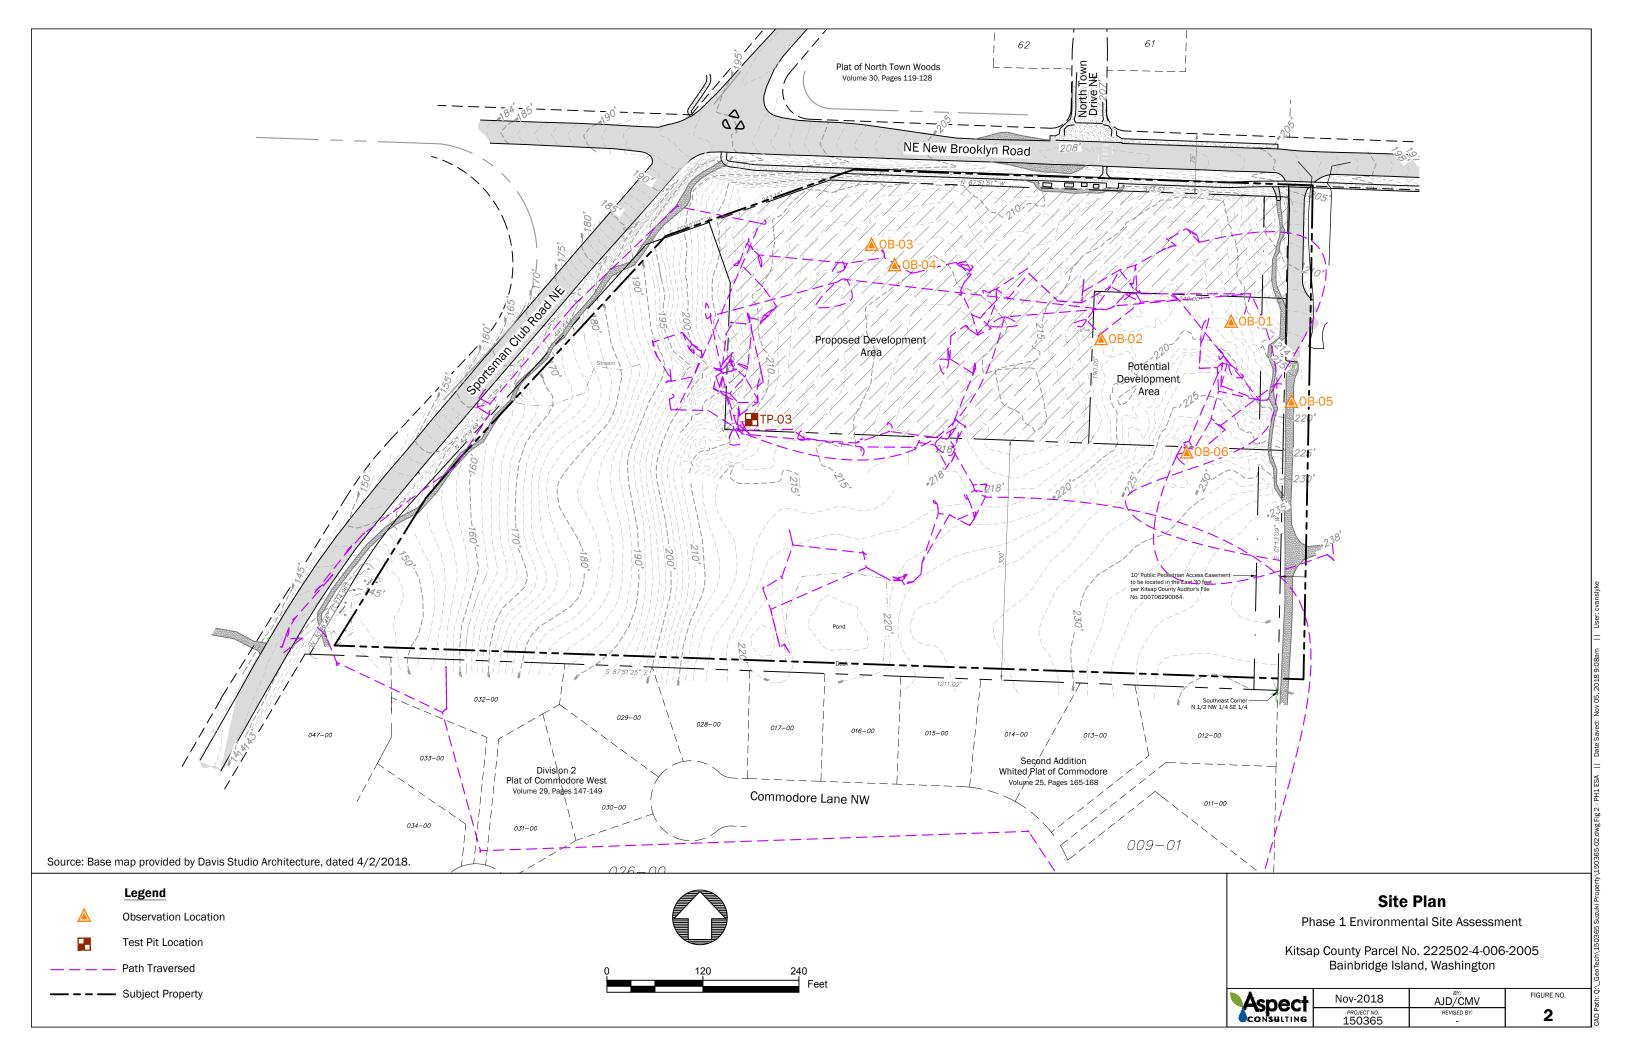

All reports prepared by Aspect for Client apply only to the Services described in the Agreement with Client. Any use or reuse of the report by any party, other than the Client and any Client-authorized third party approved in writing by Aspect, is at the sole risk of that party and without liability to Aspect. Aspect's original files/reports shall govern in the event of any dispute regarding the content of electronic documents furnished to others.

Please refer to Appendix E titled "Report Limitations and Guidelines for Use" for additional information governing the use of this report.

We appreciate the opportunity to perform these Services. If you have any questions, please call Alison Dennison at 206-780-7717.

APPENDIX B

User Questionnaire and Property Information

Phase I ESA User Questionnaire

To qualify for one of the Landowner Liability Protections and to assist in our site investigations, we ask that you complete the following questionnaire and provide additional information as requested.

- 1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
- **2.** Are you aware of any activity and land use limitations (AULs), such as engineering controls, land use restrictions, institutional controls that are in place at the site and/or have been filed or recorded under federal, tribal, state or local law?
- **3.** As the user of the ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
- **4.** Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
- **5.** Are you aware of commonly known or reasonably ascertainable information about the property that would help us identify conditions indicative of releases or threatened releases?
 - **a.** Do you know of the past uses of the property?
 - **b.** Do you know of specific chemicals that are present or once were present at the property?
 - **c.** Do you know of spills or other chemical releases that have taken place at the property?
 - **d.** Do you know of any environmental cleanups that have taken place at the property?
- **6.** As the user of this Phase I ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?
- 7. Please provide names and phone numbers of key individuals with knowledge of historical and/or current site use

Our Privacy Policy

We may collect nonpublic personal information about you from the following sources:

- Information we receive from you such as on applications or other forms.
- Information about your transactions we secure from our files, or from others.
- Information we receive from a consumer reporting agency.
- Information that we receive from others involved in your transaction, such as the real estate agent or lender.

Unless it is specifically stated otherwise in an amended Privacy Policy Notice, no additional nonpublic personal information will be collected about you.

WE DO NOT DISCLOSE ANY NONPUBLIC PERSONAL INFORMATION ABOUT YOU WITH ANYONE FOR ANY PURPOSE.

We restrict access to nonpublic personal information about you to those employees who need to know that information in order to provide products or services to you. We maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

Thank you for choosing Pacific Northwest Title. We value you as a customer and appreciate the opportunity to serve you.

Condition of Title Guarantee CLTA Guarantee Form No. 28

Issued By OLD REPUBLIC TITLE INSURANCE COMPANY

Guarantee No. CTG 08001586

SUBJECT TO THE EXCLUSIONS FROM COVERAGE, AND THE GUARANTEE CONDITIONS ATTACHED HERETO AND MADE A PART OF THIS GUARANTEE, OLD REPUBLIC NATIONAL TITLE INSURANCE COMPANY, a Florida corporation, herein called the Company

GUARANTEES

the Assured named in Schedule A of this Guarantee against loss or damage not exceeding the Amount of Liability stated in Schedule A sustained by the Assured by reason of any incorrectness in the Assurances set forth in Schedule A.

Issued through the office of: Pacific Northwest Title Company of Kitsap County, Inc. 2021 Myhre Road NW, Suite 300 Post Office Box 3607 Silverdale, WA 98383

Blue S. Kieland

OLD REPUBLIC NATIONAL TITLE INSURANCE COMPANY

A Stock Company 400 Second Avenue South, Minneapolis, Minnesota 55401 (612) 371-1111

By Mack Below F

Secretary

EXCLUSIONS FROM COVERAGE

Except as expressly provided by the assurances in Schedule A, the Company assumes no liability for loss or damage by reason of the following:

- (a) Defects, liens, encumbrances, adverse claims or other matters affecting the title to any property beyond the lines of the Land.
- (b) Defects, liens, encumbrances, adverse claims or other matters, whether or not shown by the Public Records (1) that are created, suffered, assumed or agreed to by one or more of the Assureds; or (2) that result in no loss to the Assured.
- (c) Defects, liens, encumbrances, adverse claims or other matters not shown by the Public Records.
- (d) The identity of any party shown or referred to in any of the schedules of this Guarantee.
- (e) The validity, legal effect or priority of any matter shown or referred to in any of the schedules of this Guarantee.
- (f) (1) Taxes or assessments of any taxing authority that levies taxes or assessments on real property; or, (2) proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not the matters excluded under (1) or (2) are shown by the records of the taxing authority or by the Public Records.
- (g) (1) Unpatented mining claims; (2) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (3) water rights, claims or title to water, whether or not the matters excluded under (1), (2) or (3) are shown by the Public Records.

GUARANTEE CONDITIONS

1. DEFINITION OF TERMS

The following terms when used in this Guarantee mean:

- (a) "the Assured": the party or parties named as the Assured in Schedule A, or on a supplemental writing executed by the Company.
- (b) "Land": the Land described or referred to in Schedule A, and improvements affixed thereto which by law constitute real property. The term "land" does not include any property beyond the lines of the area described or referred to in Schedule A, nor any right, title, interest estate or easement in abutting streets, roads, avenues, alleys, lanes, ways or waterways.
- (c) "Mortgage": mortgage, deed of trust, trust deed, or other security instrument.
- (d) "Public Records": those records established under state statutes at Date of Guarantee for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without knowledge.
- (e) "Date of Guarantee": the Date of Guarantee set forth in Schedule A.
- (f) "Amount of Liability": the Amount as stated in Schedule A.

2. NOTICE OF CLAIM TO BE GIVEN BY ASSURED

An Assured shall notify the Company promptly in writing in case knowledge shall come to the Assured of any assertion of facts, or claim of title or interest that is contrary to the assurances set forth in Schedule A and that might cause loss or damage for which the Company may be liable under this Guarantee. If prompt notice shall not be given to the Company, then all liability of the Company shall terminate with regard to the matter or matters for which prompt notice is required; provided, however, that failure to notify the Company shall in no case prejudice the rights of the Assured under this Guarantee unless the Company shall be prejudiced by the failure and then only to the extent of the prejudice.

3. NO DUTY TO DEFEND OR PROSECUTE

The Company shall have no duty to defend or prosecute any action or proceeding to which the Assured is a party, notwithstanding the nature of any allegation in such action or proceeding.

4. COMPANY'S OPTION TO DEFEND OR PROSECUTE ACTIONS; DUTY OF ASSURED TO COOPERATE

Even though the Company has no duty to defend or prosecute as set forth in Paragraph 3 above:

- (a) The Company shall have the right, at its sole option and cost, to institute and prosecute any action or proceeding, interpose a defense, as limited in Paragraph 4(b), or to do any other act which in its opinion may be necessary or desirable to establish the correctness of the assurances set forth in Schedule A or to prevent or reduce loss or damage to the Assured. The Company may take any appropriate action under the terms of this Guarantee, whether or not it shall be liable hereunder, and shall not thereby concede liability or waive any provision of this Guarantee. If the Company shall exercise its rights under this paragraph, it shall do so diligently.
- (b) If the Company elects to exercise its options as stated in Paragraph 4(a) the Company shall have the right to select counsel of its choice (subject to the right of the Assured to object for reasonable cause) to represent the Assured and shall not be liable for and will not pay the fees of any other counsel, nor will the Company pay any fees, costs or expenses incurred by an Assured in the defense of those causes of action which allege matters not covered by this Guarantee.
- (c) Whenever the Company shall have brought an action or interposed a defense as permitted by the provisions of this Guarantee, the Company may pursue any litigation to final determination by a court of competent jurisdiction and expressly reserves the right, in its sole discretion, to appeal from an adverse judgment or order.
- (d) In all cases where this Guarantee permits the Company to prosecute or provide for the defense of any action or proceeding, the Assured shall secure to the Company the right to so prosecute or provide for the defense of any action or proceeding, and all appeals therein, and permit the Company to use, at its option, the name of such Assured for this purpose. Whenever requested by the Company, the Assured, at the Company's expense, shall give the Company all reasonable aid in any action or proceeding, securing evidence, obtaining witnesses, prosecuting or defending the action or lawful act which in the opinion of the Company may be necessary or desirable to establish the correctness of the assurances set forth in Schedule A or to prevent or reduce loss or damage to the Assured. If the Company is prejudiced by the failure of the Assured to furnish the required cooperation, the Company's obligations to the Assured under the Guarantee shall terminate.

GUARANTEE CONDITIONS (Continuation)

5. PROOF OF LOSS OR DAMAGE

- (a) In the event the Company is unable to determine the amount of loss or damage, the Company may, at its option, require as a condition of payment that the Assured furnish a signed proof of loss. The proof of loss must describe the defect, lien, encumbrance, or other matter that constitutes the basis of loss or damage and shall state, to the extent possible, the basis of calculating the amount of the loss or damage.
- (b) In addition, the Assured may reasonably be required to submit to examination under oath by any authorized representative of the Company and shall produce for examination, inspection and copying, at such reasonable times and places as may be designated by any authorized representative of the Company, all records, books, ledgers, checks, correspondence and memoranda, whether bearing a date before or after Date of Guarantee, which reasonably pertain to the loss or damage. Further, if requested by any authorized representative of the Company, the Assured shall grant its permission, in writing, for any authorized representative of the Company to examine, inspect and copy all records, books, ledgers, checks, correspondence and memoranda in the custody or control of a third party, which reasonably pertain to the loss or damage. All information designated as confidential by the Assured provided to the Company pursuant to this paragraph shall not be disclosed to others unless, in the reasonable judgment of the Company, it is necessary in the administration of the claim. Failure of the Assured to submit for examination under oath, produce other reasonably requested information or grant permission to secure reasonably necessary information from third parties as required in the above paragraph, unless prohibited by law or governmental regulation, shall terminate any liability of the Company under this Guarantee to the Assured for that claim.

6. OPTIONS TO PAY OR OTHERWISE SETTLE CLAIMS: TERMINATION OF LIABILITY

In case of a claim under this Guarantee, the Company shall have the following additional options:

- (a) To pay or tender payment of the Amount of Liability together with any costs, attorneys' fees, and expenses incurred by the Assured that were authorized by the Company up to the time of payment or tender of payment and that the Company is obligated to pay.
- (b) To pay or otherwise settle with the Assured any claim assured against under this Guarantee. In addition, the Company will pay any costs, attorneys' fees, and expenses incurred by the Assured that were authorized by the Company up to the time of payment or tender of payment and that the Company is obligated to pay; or
- (c) To pay or otherwise settle with other parties for the loss or damage provided for under this Guarantee, together with any costs, attorneys' fees, and expenses incurred by the Assured that were authorized by the Company up to the time of payment and that the Company is obligated to pay.

Upon the exercise by the Company of either of the options provided for in 6 (a), (b) or (c) of this paragraph the **Company's obligation** to the Assured under this Guarantee for the claimed loss or damage, other than the payments required to be made, shall terminate, including any duty to continue any and all litigation initiated by the Company pursuant to Paragraph 4.

7. LIMITATION OF LIABILITY

- (a) This Guarantee is a contract of Indemnity against actual monetary loss or damage sustained or incurred by the Assured claimant who has suffered loss or damage by reason of reliance upon the assurances set forth in Schedule A and only to the extent herein described, and subject to the Exclusions From Coverage of this Guarantee.
- (b) If the Company, or the Assured under the direction of the Company at the Company's expense, removes the alleged defect, lien or, encumbrance or cures any other matter assured against by this Guarantee in a reasonably diligent manner by any method, including litigation and the completion of any appeals therefrom, it shall have fully performed its obligations with respect to that matter and shall not be liable for any loss or damage caused thereby.
- (c) In the event of any litigation by the Company or with the Company's consent, the Company shall have no liability for loss or damage until there has been a final determination by a court of competent jurisdiction, and disposition of all appeals therefrom.
- (d) The Company shall not be liable for loss or damage to the Assured for liability voluntarily assumed by the Assured in settling any claim or suit without the prior written consent of the Company.

8. REDUCTION OF LIABILITY OR TERMINATION OF LIABILITY

All payments under this Guarantee, except payments made for costs, attorneys' fees and expenses pursuant to Paragraph 4 shall reduce the Amount of Liability under this Guarantee pro tanto.

GUARANTEE CONDITIONS (Continuation)

9. PAYMENT OF LOSS

- (a) No payment shall be made without producing this Guarantee for endorsement of the payment unless the Guarantee has been lost or destroyed, in which case proof of loss or destruction shall be furnished to the satisfaction of the Company.
- (b) When liability and the extent of loss or damage has been definitely fixed in accordance with these Conditions, the loss or damage shall be payable within thirty (30) days thereafter.

10. SUBROGATION UPON PAYMENT OR SETTLEMENT

Whenever the Company shall have settled and paid a claim under this Guarantee, all right of subrogation shall vest in the Company unaffected by any act of the Assured claimant.

The Company shall be subrogated to and be entitled to all rights and remedies which the Assured would have had against any person or property in respect to the claim had this Guarantee not been issued. If requested by the Company, the Assured shall transfer to the Company all rights and remedies against any person or property necessary in order to perfect this right of subrogation. The Assured shall permit the Company to sue, compromise or settle in the name of the Assured and to use the name of the Assured in any transaction or litigation involving these rights or remedies.

If a payment on account of a claim does not fully cover the loss of the Assured the Company shall be subrogated to all rights and remedies of the Assured after the Assured shall have recovered its principal, interest, and costs of collection.

11. ARBITRATION

Either the Company or the Assured may demand that the claim or controversy shall be submitted to arbitration pursuant to the Title Insurance Arbitration Rules of the American Land Title Association ("Rules"). Except as provided in the Rules, there shall be no joinder or consolidation with claims or controversies of other persons. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the Assured arising out of or relating to this Guarantee, any service of the Company in connection with its issuance or the breach of a Guarantee provision, or to any other controversy or claim arising out of the transaction giving rise to this Guarantee. All arbitrable matters when the amount of liability is \$2,000,000 or less shall be arbitrated at the option of either the Company or the Assured. All arbitrable matters when the amount of liability is in excess of \$2,000,000 shall be arbitrated only when agreed to by both the Company and the Assured. Arbitration pursuant to this Guarantee and under the Rules shall be binding upon the parties. Judgment upon the award rendered by the Arbitrator(s) may be entered in any court of competent jurisdiction.

12. LIABILITY LIMITED TO THIS GUARANTEE; GUARANTEE ENTIRE CONTRACT

- (a) This Guarantee together with all endorsements, if any, attached hereto by the Company is the entire Guarantee and contract between the Assured and the Company. In interpreting any provision of this Guarantee, this Guarantee shall be construed as a whole.
- (b) Any claim of loss or damage, whether or not based on negligence, or any action asserting such claim, shall be restricted to this Guarantee.
- (c) No amendment of or endorsement to this Guarantee can be made except by a writing endorsed hereon or attached hereto signed by either the President, a Vice President, the Secretary, an Assistant Secretary, or validating officer or authorized signatory of the Company.

13. SEVERABILITY

In the event any provision of this Guarantee, in whole or in part, is held invalid or unenforceable under applicable law, the Guarantee shall be deemed not to include that provision or such part held to be invalid, but all other provisions shall remain in full force and effect.

14. CHOICE OF LAW; FORUM

(a) Choice of Law: The Assured acknowledges the Company has underwritten the risks covered by this Guarantee and determined the premium charged therefore in reliance upon the law affecting interests in real property and applicable to the interpretation, rights, remedies, or enforcement of Guaranties of the jurisdiction where the Land is located.

GUARANTEE CONDITIONS (Continuation)

Therefore, the court or an arbitrator shall apply the law of the jurisdiction where the Land is located to determine the validity of claims that are adverse to the Assured and to interpret and enforce the terms of this Guarantee. In neither case shall the court or arbitrator apply its conflicts of law principles to determine the applicable law.

(b) Choice of Forum: Any litigation or other proceeding brought by the Assured against the Company must be filed only in a state or federal court within the United States of America or its territories having appropriate jurisdiction.

15. NOTICES, WHERE SENT

All notices required to be given the Company and any statement in writing required to be furnished the Company shall include the number of this Guarantee and shall be addressed to the Company at the office which issued this Guarantee or to its Home Office at 400 Second Avenue South, Minneapolis, Minnesota 55401-2499, (612) 371-1111.

PUBLIC PEDESTRIAN ACCESS EASEMENT

Grantor:

City of Bainbridge Island, Washington, a municipal

corporation

Grantee:

Bainbridge Island School District No. 303.

Short Legal Description:

That portion of the N 1/2 of the NW 1/4 of the SE 1/4,

Section. 22, T. 25 N., R. 2 E., W.M., Kitsap County,

Washington,

(Complete legal description on Exhibit A)

Parcel/Account Number(s):

Tax Parcel No. 222502-4-006-2005

Reference Number(s) of Documents Assigned

or Released:

N/A

THIS PUBLIC PEDESTRIAN ACCESS EASEMENT (hereinafter the "Easement") is made and entered by and between the City of Bainbridge Island, a municipal corporation of the State of Washington (hereinafter the "Grantor"), and the Bainbridge Island School District No. 303 (hereinafter the "Grantee").

Recitals

WHEREAS, the Grantor is the owner of certain real property located within the City of Bainbridge Island, Kitsap County, Washington, and legally described on Exhibit "A", a copy of which is attached hereto and incorporated herein by this reference (hereinafter the "City Property").

WHEREAS, the Grantor desires to convey to the Grantee a perpetual easement for public pedestrian access across a portion of the City Property, as more fully set forth below.

Agreement

Now, therefore, the parties hereto agree as follows:

Grant of Perpetual Easement for Public Pedestrian Access. For and in valuable consideration as provided herein, the Grantor grants, conveys, and warrants to the Grantee a non-exclusive perpetual easement for the purpose of public pedestrian access with necessary appurtenances over, in, across, and through that portion of the City Property as shown on the map attached hereto as Exhibit "C" and as legally described on Exhibit "B" attached hereto (both Exhibits B and C are incorporated herein by this

reference) (hereinafter the "Easement Area"). This easement includes but is not limited to the right to construct, maintain, repair, alter, operate, use, and/or reconstruct the public pedestrian access and necessary appurtenances (hereinafter the "Trail"), and make any connections thereto within the Easement Area.

- 2. <u>Right of Access</u>. The Grantee shall have the right, without prior institution of any suit or proceeding at law, and at such times as may be necessary, to enter upon the City Property and the Easement Area for the purpose of constructing, maintaining, repairing, altering, and/or reconstructing the Trail, and making any connections thereto, all at no cost to the Grantor; provided that the Grantee shall provide the Grantor with prior written notice of any such entry or activities on the City Property, and such entry and activities by the Grantee may be delayed or rescheduled by the Grantor (in its sole discretion) as deemed necessary by the Grantor to prevent interference with the operation of the school located on the City Property..
- 3. <u>Manner of Construction of Public Pedestrian Access</u>. The construction, repair, alteration, reconstruction, maintenance and operation of the Trail shall be accomplished in such a manner that the City Property shall not be damaged or destroyed, and it shall be restored (at the Grantee's sole expense), as nearly as practicable, in as good a condition as it was immediately before it was entered upon by the Grantee.
- 4. <u>Reservation of Rights</u>. The Grantor shall retain all right, title and interest in and to the City Property, so long as the use does not unduly interfere with the installation, maintenance and operation of the City in the Easement Area, and so long as no building or other structures, except fences, are erected on the Easement Area. At no cost to the Grantor, the Grantee shall, at all times, preserve and maintain the Trail to be located in the Easement Area as a reasonably safe, usable and attractive pedestrian trail.

5. <u>Indemnification and Hold Harmless</u>.

- a. As consideration for the Easement granted hereunder, and by accepting and recording this Easement, the Grantee agrees to indemnify, defend and hold harmless the Grantor from any and all claims for injuries or damages (including without limitation attorneys' fees) suffered by any person or property which may be caused by the Grantee's exercise of the rights granted herein or by any use of the Sidewalk by any member of the public; provided, that the Grantee shall not be responsible to the Grantor for any injuries or damages suffered by any person or property caused by acts or omissions of the Grantor or its agents.
- b. The Grantee shall satisfy all costs associated with the constructing, installing, operating, maintaining, removing, repairing, replacing and using the public pedestrian access and necessary appurtenances (including but not limited to a trail) and shall hold Grantor harmless therefrom and shall keep the City Property free of claims of lien arising out of the constructing, installing, operating, maintaining, removing, repairing, replacing and using the Sidewalk.
- 6. Relation of Easement Area to future development of City Property by the Grantor. In connection with any land use or permit application submitted by the Grantor (at any time in the future) for any improvement or redevelopment of the City Property, the Grantee agrees that: (i) the Easement Area shall be excluded from any calculation of lot area, minimum lot coverage, open space area, buffer area, or other calculation that relies on the square footage of City Property; and (ii) the width of the Easement Area shall not be included in any calculation of setbacks from lot lines, roads, buffer areas, or other similar requirements, and (iii) the existence of the Easement Area shall not, in any way, otherwise limit or restrict the improvement or redevelopment of City Property.

- 7. Relocation of Easement Area. Notwithstanding any terms herein to the contrary, the Grantor may (in its sole discretion, and further without consent or approval of the Grantee) relocate the Easement Area to any other location on the City Property; provided that (i) the Grantor prepares a revised legal description of the Easement Area and records an amendment to this Easement (which shall not require further execution by the Grantee), and (ii) the Grantor reconstructs the Trail in the new location to a standard and condition that, as nearly as is commercially reasonable, matches the construction and condition of the original Trail.
- 8. <u>Temporary Closure of Easement Area.</u> The Grantee agrees and acknowledges that the Grantor (in its sole discretion) shall have the right to temporarily close the Trail and the Easement Area to all public access during periods of construction or redevelopment of City Property upon ten (10) days' prior written notice to the Grantee. During such periods of closure, the Grantor shall be permitted to use, excavate and alter the Sidewalk; provided that the improvements within the Easement Area are restored, at the Grantor's expense, to the conditions that existed prior to such closure.
- 9. <u>Binding Effect</u>. This Easement shall be a covenant running with the land and shall be binding on, and inure to the benefit of, the successors, heirs and assigns of the Grantor and the Grantee.
- 11. <u>Good Title</u>. Grantor warrants that it has good title to the City Property and warrants the School title to, and quiet enjoyment of, the Easement conveyed herein.
- 12. <u>Complete Agreement</u>. This Easement represents the complete agreement of the parties regarding the matters described herein. There are no other verbal or written agreements regarding the easement rights and obligations set forth herein, except as contained in this Easement. This Easement may only be modified by a written document signed by the parties.
- 13. <u>Severability</u>. If any provision of this Easement is prohibited by law or otherwise determined to be invalid or unenforceable by a court of competent jurisdiction, such provision shall not affect the validity of the remaining provisions of this Easement.
- 14. <u>Governing Law</u>. This Easement shall be governed by and construed in accordance with the laws of the State of Washington.
- 15. <u>Authority</u>. Each party signing this Easement, if on behalf of an entity, represents that they have full authority to sign this Easement on behalf of such entity.
- 16. <u>Counterparts</u>. This Easement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which shall constitute one and the same agreement.

Dated this day of	-lune , 2007.

- A. Grantor, City of Bainbridge Island ("Grantor"), is the fee owner of the real property which is situated in Bainbridge Island, Kitsap County, Washington and is legally described on **Exhibit "A"**, attached hereto and incorporated by this reference ("Grantor's Property").
- B. Grantor desires to convey to the City of Bainbridge Island, Washington (the "City"), a portion of Grantor's Property for right-of-way purposes and a slope easement in accordance herewith.

NOW, THEREFORE,

THE GRANTOR, for and in consideration of the benefits of a public right-of-way and other good and valuable consideration, in hand paid, and in lieu of condemnation, hereby warrants and conveys to the CITY OF BAINBRIDGE ISLAND, WASHINGTON, a municipal corporation, that portion of Grantor's Property which is legally described on **Exhibit "B"** and shown on attached **Exhibit "C"** hereto and incorporated by this reference (the "Right-of-Way")

in fee simple and not as an easement, for use and occupancy by the City and the general public for the construction, development, maintenance, repair, replacement and use of: (i) roadways known as **NE New Brooklyn Road** and **Sportsman Club Road NE (Permanent Highway No. 13)**, (ii) other reasonable and appropriate uses appurtenant to municipal roadways and utility installation and use, including, without limitation, sidewalks, curbs, and gutters; and (iii) utility facilities for the benefit and use of the City and utility purveyors.

Grantor further grants and conveys to the City a perpetual, non-exclusive easement for the purpose of making and undertaking all necessary slopes for cuts and fills incident or appurtenant to the construction and maintenance of roadway slopes in excavation and/or embankment for roadway purposes, in conformity with City engineering design and development standards for roadways, over, under, upon and across the portion of the Grantor's Property abutting the Right-of-Way.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Aspect Consulting LLC. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent NPL

HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the HSL list, as provided by EDR, and dated 02/21/2018 has revealed that there are 3 HSL sites within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CHEVRON USA INC SS 2 Facility Type: Hazardous Sites List FSID Number: 96325489 Facility Status: Cleanup Started	1220 HILDEBRAND LANE	SE 1/2 - 1 (0.605 mi.)	22	43

TOSCO BAINBRIDGE ISL Facility Type: Hazardous Sites List FSID Number: 26595127 Facility Status: Cleanup Started	WEAVER AVE & SHEPARD	S 1/2 - 1 (0.996 mi.)	26	82

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 04/16/2018 has revealed that there are 7 CSCSL sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within

approximately 0.5 miles of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 04/16/2018 has revealed that there is 1 CSCSL NFA site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
BAINBRIDGE ISLAND SC	9451 NEW BROOKLYN RD	ENE 0 - 1/8 (0.101 mi.)	A3	9

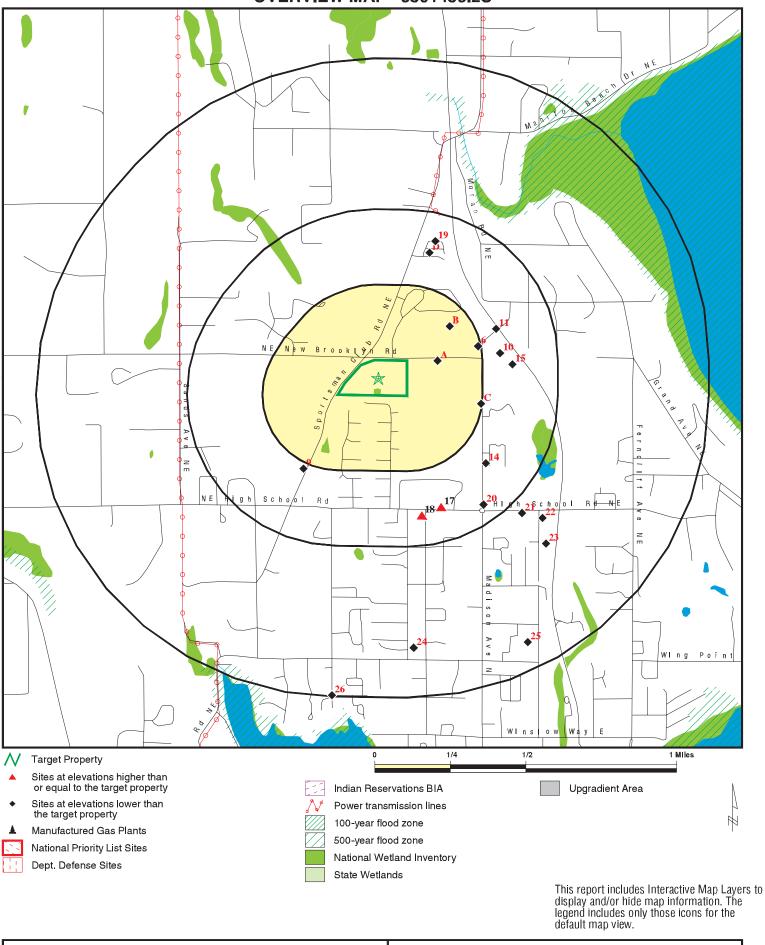

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 01/31/2015 has revealed that there is 1 FUDS site within approximately 1 mile of the target property.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water

Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RAB: Not reported

CORPS_DIST: Kansas City District (NWK)

NPL Status: Not Listed CTC: 120.8

Current Owner: Local Government Future Prog: Not reported

Description: NEAR WINSLOW, WA. The project site consists of a control site, launch

site, and a family housing facility. At the control site, the concrete towers and wood piling constitute a safety hazard and, along with the concrete walkway and stairs, are not compatible with present land use. At the launch site, access to the interior of the two missile storage pits used in common by the former Nike batteries needs to be permanently reduced as a safety feature to control unauthorized entry,

to avoid recurrent vandalism, and to prevent harmful injury.

Current Program: Not reported

History: The Nike missile launch and control facility was constructed between

1954 and 1956. In 1967, that portion of the property under consideration was transferred to the Bainbridge Island Park and

Recreation District.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Source: EDR, Inc.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 01/03/2018 Date Data Arrived at EDR: 02/14/2018 Date Made Active in Reports: 03/22/2018

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

South Map: 6005551 BREMERTON EAST, WA

Version Date: 2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

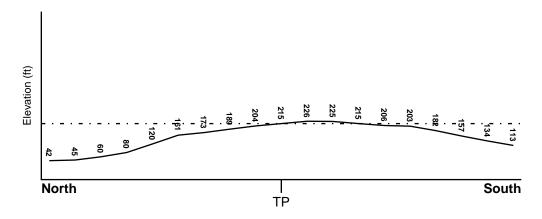

TOPOGRAPHIC INFORMATION

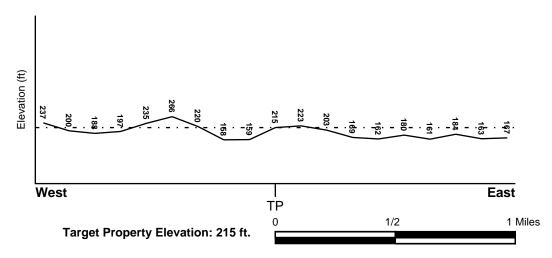

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

SUQUAMISH YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Harstine

Soil Surface Texture: gravelly sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward

movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 84 inches

Soil Layer Information								
Layer	Boundary			Classification		Saturated hydraulic		
	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)	
1	0 inches	0 inches	gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 0.42 Min: 0.01	Max: 6.5 Min: 6.1	
2	0 inches	33 inches	gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 0.42 Min: 0.01	Max: 6.5 Min: 6.1	
3	33 inches	59 inches	very gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 0.42 Min: 0.01	Max: 6.5 Min: 6.1	

Soil Map ID: 2

Soil Component Name: Kapowsin

Soil Surface Texture: gravelly loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward

movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Ecology Telephone: 360-407-6121

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells

Source: Department of Health Telephone: 360-236-3148 Group A and B well locations.

Water Well Listing

APPENDIX E

Report Limitations and Guidelines for Use

E. Report Limitations and Guidelines for Use

Reliance Conditions for Third Parties

This report was prepared for the exclusive use of the Client. No other party may rely on this report or the product of our services without the express written consent of Aspect Consulting, LLC (Aspect). This limitation is to provide our firm with reasonable protection against liability claims by third parties with whom there would otherwise be no contractual conditions or limitations and guidelines governing their use of the report. Within the limitations of scope, schedule and budget, our services have been executed in accordance with our Agreement with the Client and recognized standards of professionals in the same locality and involving similar conditions.

Geoscience is Not Exact

The geoscience practices (geotechnical engineering, geology and environmental science) are far less exact than other engineering and natural science disciplines. It is important to recognize this limitation in evaluating the content of the report. If you are unclear how these "Report Limitations and Guidelines for Use" apply to your project or site you should contact Aspect Consulting.

Environmental Services Are Performed for Specific Purposes, Persons and Projects

Aspect has performed the services in general accordance with the scope and limitations of our Agreement and the current version of the "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," ASTM E1527, and U.S. Environmental Protection Agency's (EPA) Federal Standard 40 CFR Part 312 "Innocent Landowners, Standards for Conducting All Appropriate Inquiries." This report has been prepared for the exclusive use of the Olympic Property Group and their authorized third parties, approved in writing by Aspect. This report is not intended for use by others, and the information contained herein is not applicable to other properties.

This Phase I Environmental Site Assessment (ESA) is not, and should not, be construed as a warranty or guarantee regarding the presence or absence of hazardous substances or petroleum products that may affect the subject property. The report is not intended to make any representation concerning title or ownership to the subject property. Real property records were reviewed for the sole purpose of determining the subject property's historical uses. All findings, conclusions, and recommendations stated in this report are based on the data and information provided to Aspect, current use of the subject property, and observations and conditions that existed on the date and time of the ESA.

Aspect structures its services to meet the specific needs of our clients. Because each environmental study is unique, each environmental report is unique, prepared solely for the specific client and project property. This report should not be applied for any purpose or project except the purpose described in the Agreement.

This Environmental Report - Project-Specific Factors

Aspect Consulting considered a number of unique, project-specific factors when establishing the Scope of Work for this project and report. You should not rely on this report if it was:

- Not prepared for you
- Not prepared for the specific purpose identified in the Agreement
- Not prepared for the specific real property assessed
- Completed before important changes occurred concerning the real property, project or governmental regulatory actions

If changes are made to the project or subject property after the date of this report, Aspect Consulting should be retained to assess the impact of the changes with respect to the conclusions contained in the report.

Historical Information Provided by Others

Aspect Consulting has relied upon information provided by others in our description of historical conditions and in our review of regulatory databases and files. The available data does not provide definitive information with regard to all past uses, operations or incidents affecting the real property or adjacent properties. Aspect Consulting makes no warranties or guarantees regarding the accuracy or completeness of information provided or compiled by others.

Uncertainty Remains Even After an ESA Study Is Completed

No ESA can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with real property. Performance of an ESA study is intended to reduce, but not eliminate, uncertainty regarding the potential for environmental conditions affecting the real property. There is always a potential that areas with contamination that were not identified during this ESA exist at the subject property or in the study area. Further evaluation of such potential would require additional research, subsurface exploration, sampling and/or testing.

Environmental Regulations Are Not Static

Some hazardous substances or petroleum products may be present in the vicinity of the subject property in quantities or under conditions that may have led, or may lead, to contamination of the subject property, but are not included in current local, state or

federal regulatory definitions of hazardous substances or petroleum products or do not otherwise present potential liability. Changes may occur in the standards for appropriate inquiry or regulatory definitions of hazardous substance and petroleum products; therefore, the report has a limited useful life.

Property Conditions Change Over Time

This ESA is based on conditions that existed at the time the study was performed. The findings and conclusions of this report may be affected by the passage of time (for example, an ESA report is typically applicable for 180 days), by events such as a change in property use or occupancy, or by natural events, such as floods, earthquakes, slope instability or groundwater fluctuations. If more than six months have passed since issuance of our report or work product, or if any of the described events may have occurred following the issuance of the report, you should contact Aspect Consulting so that we may evaluate whether changed conditions affect the continued reliability or applicability of our conclusions and recommendations.

Geotechnical, Geologic and Environmental Reports Are Not Interchangeable

The equipment, techniques and personnel used to perform an environmental study differ significantly from those used to perform a geotechnical or geologic study and vice versa. For that reason, a geotechnical engineering or geologic report does not usually address any environmental findings, conclusions or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. Similarly, environmental reports are not used to address geotechnical or geologic concerns regarding the real property.

Mold, Fungus, Radon, Lead in Drinking Water, and Hazardous Building Materials

Aspect's services do not include the investigation, detection, prevention or assessment of the presence of molds, fungi, spores, bacteria, and viruses, and/or any of their byproducts. Accordingly, this report does not include any interpretations, recommendations, findings, or conclusions regarding the detection, assessment, prevention or abatement of molds, fungi, spores, bacteria, and viruses, and/or any of their byproducts. Aspect's services also do not include the investigation or assessment of hazardous building materials (HBM) such as asbestos, polychlorinated biphenyls (PCBs) in light ballasts, lead based paint, asbestos-containing building materials, urea-formaldehyde insulation in on-site structures or debris or any other HBMs. Aspect's services do not include an evaluation of radon or lead in drinking water, unless specifically requested.
